

CAB-MATE

PREFORMER

Preform attachment makes the CAB-MATE unit a semi-automatic cabachon and facet pre-forming machine. Accurately cuts cabachon stones, facet preforms in, round, marquise, ovals, emerald shapes.

The CAB-MATE PREFORMER cuts and shapes accurate Cabachon Preforms in any shape and size in minutes. No more problems getting good fits and accurate sized cabs. Simple, uses furnished cams to produce any size stones, full directions included with Preformer.

Shown cutting accurate faceting preforms; cuts round, marquise, ovals, emerald, cuts with ease. Simple to use. Foolproof. Uses Silicon Carbide wheels or new diamond periphery wheels.

Here for the first time is an efficient Preform attachment that does all of the necessary preforming in a matter of minutes. It is simple to use, attaches to the GRAVES CAB-MATE unit in 30 seconds, fully adjustable to any range of stone size. The Attachment fits on the side of the CAB-MATE with two screws and is instantly ready to use. The unit cuts on an accurate template system and adjusts size of stone by one simple adjustment. Has full size range feature; other CAB-MATE accessories shown on CAB-MATE Price List.
